

Guidelines for analysing a data wall

Big picture	<ul style="list-style-type: none"> What is noteworthy/surprising? Are there any patterns emerging? What did you expect to see/not expect to see? What do we need to investigate further? Is there other information you need to consider/add?
Individual faces	<ul style="list-style-type: none"> Where is each student now? Where were they? Who isn't progressing? What is the concern? What do we need to investigate further? Is there other information you need to consider/add? Who do we need to identify for Review and Response? What is impacting on the student's progress with the curriculum? What is the next step for a particular student or cluster of students?
Whole school implications/Strategic directions and resourcing	<ul style="list-style-type: none"> What is the school plan based on the data? How is data wall informing your professional learning? What implications does this have for supporting teachers? How can we use the data to inform classroom teaching in the context of the curriculum/pedagogy?
